

HOW TO PRINT FROM UOC MAC

Two printers will already be installed: one for **colour printing** and one for **black & white**.

The **default** printer is set to **black & white**.

When you wish to print, select the required printer from the drop-down list within the application you are using (for example, Microsoft Word).

You will be prompted to authenticate each time you print. If you choose to save your credentials to the Keychain, please note that you will need to update them if you change your password.
