

Multi-Factor Authentication (MFA)

What is MFA?

Multi Factor Authentication pairs your University password with an additional form of security, this could be an app on your smartphone, a phone call, or a text message (these are known as **Factors**). You are probably already using this system to login to things like online banking, so that your bank can be sure it is you.

MFA is used when you login to university systems on your own device or when away from campus.

Before you can use MFA you will need to sign up to the service and choose your additional factor(s). The use of MFA is mandatory for you to access university systems and will also allow you to reset your university password whenever you like.

Register for MFA

1. More information required

When you first try to login to any of the university systems (Student Hub, Blackboard, Email, StaffHub, etc.) you will receive a prompt that asks you to provide more information before you can access your account.

Check that your university email address is displayed correctly and click **Next**.

2. Keep your account secure – Install the Authenticator App You will now see the start of the **Keep your account secure** wizard.

You are prompted to download the **Microsoft Authenticator** app onto a smartphone (Staff: this can your own phone or a work phone) which is used to send you an authentication code whenever you attempt to login to your account. You will then need this mobile device with you whenever you login to your account off campus.

Your o	rganization requires you to set up the following	methods of proving who you are.
	Method 1 of 2: App	
	0	2
App Phone		Phone
icrosoft	t Authenticator Start by getting the app	
licrosoft	t Authenticator Start by getting the app On your phone, install the Microsoft Authenticator ap After you install the Microsoft Authenticator app	tor app. Download now p on your device, choose "Next".

There is a **Download now** link on the page, but you may want to open your iPhone or Android app store and search for **Microsoft Authenticator** (provided by Microsoft Corporation) of scan one of the following codes:

Microsoft Authenticator app -	Microsoft Authenticator app -
Android	iPhone

Additional information about downloading and installing the Microsoft Authenticator app is available here if required: <u>Download and install information</u>

When you have installed the Microsoft Authenticator app on your device, return to the "Keep your account secure" wizard and click **Next**.

3. Keep your account secure – Connect the Authenticator App

Now you need to add your university account to the Authenticator app on your mobile device. You can click **Next** on this following screen:

Varia annaisseina annaisseina ta	t in the fellouine methods of provine who include
Your organization requires you to se	et up the following methods of proving who you are.
N	lethod 1 of 2: App
	2
App	Phone
Vicrosoft Authenticator	t
Aicrosoft Authenticator Set up your accoun If prompted. allow notificatio	t ns. Then add an account, and select "Work or school".

The **Keep your account secure** page should now display a QR code that will help to connect to your account.

Your o	rganization requires you to set u	p the following methods of proving who you are.
	Meth	nod 1 of 2: App
	0	2
App		Phone
	Scan the QR code	
	Scan the QR code Use the Microsoft Authentica Microsoft Authenticator app After you scan the QR code. Can't scan image?	ator app to scan the QR code. This will connect the with your account. choose "Next".

Open the Microsoft Authenticator app on your phone:

- a. Allow notifications (if prompted)
- b. Allow the app to access your camera (if prompted)
- c. Allow the app to access storage (if prompted)
- d. Select to **Add your first account** on the opening screen
- e. Or click on the Menu button (top right) to choose to Add account.

- f. Choose to add **Work or school account**
- g. You will then have the option to scan the QR code (from the "Keep your account secure" page) or to manually add your University of Cumbria login. The QR code is quicker and easier.

The Authenticator app should have successfully added your university account without any additional information from you.

If there is a problem reading the QR code or another error, please close the Authenticator app and try again or you can choose the **Can't scan image** option on the "Keep your account secure" webpage. You will then be presented with some information and a code to enter manually into the app.

4. Keep your account secure – Test the connection

The "Keep your account secure" page will now send a test notification to the Authenticator app.

	Your organization requires you to set up some n	nethods of proving who you are.	
	1 App	2 Phone	
icrosc	oft Authenticator Let's try it out		

When you accept the notification on your phone, the webpage should change to confirm that you have approved it.

	Keep your	account secure	9

-	Let's try it out Approve the notification we're ser O Notification approved	nding to your app.	Back	Next

You can click on **Next** to confirm everything. MFA is now setup for you to use.

Using MFA with the Microsoft Authenticator App

Whenever you try to login to one of our systems (on your own device or off campus) you will usually complete this action through three screens:

1. Username screen

The first screen will ask for your username which is your university email address.

Students: s000000@uni.cumbria.ac.uk (where "0000000" is your student number)

Staff: firstname.lastname@cumbria.ac.uk

University of Cumbria	07

Can't access your acco	unt?	
	Back	Next
For assistance pleas Email:servicedesk@c Telephone:+44(0122	e contact the Ser cumbria.ac.uk or 28)888888.	vice Desk

2. Password screen

The second screen needs your University of Cumbria password.

3. MFA screen

The third screen wants you to confirm your identity using MFA.

University of Cumbria
sebastian.meer@cumbria.ac.uk
Enter code
ItemPlease type in the code displayed on your authenticator app from your device
Code
Don't ask again for 7 days
Having trouble? Sign in another way
More information
Verify

You will need to open the Microsoft Authenticator app and **select** your **University of Cumbria** account:

The screen in the authenticator app will change to present you with a 6-digit code.

In the **Enter Code** section of the system you are trying to access – type in the code shown in the app:

University of Cumbria
sebastian.meer@cumbria.ac.uk
Enter code
Please type in the code displayed on your authenticator app from your device
243961
Don't ask again for 7 days
Having trouble? Sign in another way
More information
Verify

Hit Verify and you should be logged into the system you are trying to access.

Please note: The Microsoft Authenticator app automatically generates a new code every 30 seconds. If you do not use the code before it expires, you will need to use the app to get a new code.

Every 180 days you will be asked to check all your information is still current.
